

1.

On App, use the following sequence for the categories, also remove miscellaneous:

Food, Housing, Meals,
Employment, Utilities, Finances
Personal Development, Child Care, School Districts
Retirement, Entertainment, Support Programs,
Help Under 18.

2.

Description and images for each category should be taken from website and updated:

<https://breakingboundariestx.com/categories>

3. Remove timing as well

4. Navbar should be visible on all screens at the bottom. Also, the 4 square should be replaced with a home icon and should be clickable to take the user on homepage.

5. Populate videos for all categories (attaching in task with labels)
6. On the recently shared build, Google Map is coming up in Arabic. Also, the geolocation is showing somewhere in Dubai to client.
7. During registration process, after selecting state as Texas, there is no option in category to search for the desired city. To select Waco, user will have to scroll the list all down. Please resolve that
8. Inside the subcategories, like Food banks, swap the grid view with a list view and show all thie items in list rather than showing those boxes. That way, we won't need to add pictures for those boxes.
9. add provided clickable websites for each
10. As discussed, we remove the email icon and button. Kindly replace that with Website and keep the website hyperlinked (website info is provided in the Food bank category data)
11. On the homepage i.e.; categories page, increase the size of logo a bit more, it's not readable completely.
12. On the Get Started page, remove "unlock your digital..." verbiage. Write "Welcome to Breaking Boundaries TX"
